- * Comment. The observation of 16 x 37-mm AA guns with funnel-shaped muzzles and of 12 other artillery pieces, probably 12.7-mm AA machine guns standing on the ground or 20-mm AA guns.

almost definitely prove that the 2500th Gds AAA Regt of the 13th Gds Mecz Div is stationed at Kaisersteinbruch at present. It will be determined later whether the regiment will be stationed there during the winter months.

 Comment. Units in Goetzendorf include elements of the 13th Gas Recz Div, among them probably the 55th Tank Tng Bn and an artillery unit. However, since it is believed that these units do not occupy the barracks installation in Fasangarten to capacity, one or two more units of this division are carried there.
